

TECHNICAL DATA SHEET

DESCRIPTION

Snow chains for PASSENGER CARS, 4x4, SUV and VANS. For use on snow or ice exclusively. Tested and certified driving on dry asphalt at 50km/h during 120 kms..

Only 5 sizes (60, 70, 80, 90 and 100) cover almost 95% of tire dimensions thanks to the textile elastic properties (patented).

IN CLOSE DETAIL

- Diagonal structure textile, reinforced with parallel segments.
- External straps for avoiding losing the chain and avoiding also that the chain gets into the wheel causing damages on the suspension parts, breaking system and other sensors and captors...
- No external net, perfect for allowing snow/ice evacuation and preventing from losing the chain due to overweight.
- Double inside-outside sewn system => Central chain mesh reinforced; better traction and longer life.
- Material: 100 % PES HT (high tenacity polymer)
Resistance :253,5kg/cm2
- Water repellent and anti-bacterial textile (no bad smells when kept wet)

European HOMOLOGATION EN-1662-1

PACKAGING

Each pair of SILKNET is delivered in a robust nylon bag.

SILKNET Plus
